

Perfect Eyebrows

Carmen Duma, Eyebrow Queen, says creating the ultimate glam look may be as simple as an eyebrow makeover. Eyebrows are such a prominent feature of the face, and with the right eyebrow shaping, they highlight the eyes and accentuate the cheekbones.

Eyebrow Queen Secrets

- Treat yourself to a professional eyebrow makeover. If only once, you'll see what a difference shaping can do for your face.
- Tend to your eyebrows once a week. Overplucking often occurs when the brows are overgrown, consequently losing the perfect shape.
- A good cream-to-powder filler is best to fill in brows. Cheap pencils and mascara can make your look unnatural.
- Use angled or pointed tweezers to remove very new hairs.

A common myth is that gorgeous eyebrows need to be thin. Carmen Duma strongly disagrees with this idea arguing that the ideal shape will be different for every person. "I look at a face and decide how the features can be enhanced by the shape and colour of the eyebrows," she says.

The Facelift

Carmen believes that having your brows shaped is equal to a 15 minute face-lift. For instance, lengthening the face can be achieved by heightening the brow arch and exposing more of the brow bone.

Eyebrow Language

The shape of your eyebrows can influence your facial expression. Eyebrows that give the impression of one continuous brow can make the face look angry or sad. Eyebrows that have been overplucked on the inner half may convey a surprised look. **Phone: 9827 7164.**
