THE EXPERT ADVICE

Get comfortable with feeling uncomfortable

Regardless of how hairy your brows are, it's important to give your brow artist at least two weeks' worth of growth in order to find the right shape for you. At The Eyebrow Queen, Carmen adopts a multifaceted approach to brow shaping by waxing, trimming and plucking unwanted hairs in order to follow the shape dictated by one's personal brow bone.

Go up and beyond

In order to give the illusion of thicker-looking brows, always brush brows upwards. The Eyebrow Queen recommends using an

AMBER HEARD

angled-brush or mascara wand to brush brows up and away from the centre of the face. Try Artiste Angled Eyebrow Brush #39 or Benefit's Gimme Brow mascara wand.

MEGAN FOX

Be a powder puff

The Eyebrow Queen suggests using brow powder to achieve a subtle and softer looking brow. Gently apply powder to the brows and in short hair-like strokes, even it out. If you require any touch-ups, use a brow pencil as a secondary measure. Try an eyebrow powder or blend a few together to get the perfect shade in an eyebrow kit such as ModelCo's EYEBROWS Designer Brow Kit or NYX Cosmetic's Eyebrow Cake Powder. For a brow pencil, try Shiseido The Makeup Eyebrow Pencil.

Fade like a pro

As with many things in life, less is sometimes more. Avoid making brows too dark and bold. Instead, opt for a more faded look by making brows darker at the tail and lighter at the head.

Highlight your arch

Use a soft brow highlight underneath the arch to accentuate the brow shape and achieve the illusion of thicker hair growth.

Maintain the magnificence

Tend to overbrows once a week. Overplucking often occurs when the brows are overgrown, consequently losing the perfect shape.

HILARY DUFF

Always use angled or pointed tweezers to remove any new hairs around the brows. Avoid eyebrow trends, such as thin or bushy brows. Instead, follow the natural shape dictated by your brow bone for the perfect arch. Try Manicare's Point Tweezers.

Filler in

A good cream-to-powder filler is best to fill in brows. Cheap pencils and mascara can make brows look unnatural. To set eyebrows firmly in place try a clear gel such as Arbonne Eyebrow Gel. **SW**
